Florence born architect **Maurizio Duranti** is synonymous with sophistication and style. His innovative realisation for building structures have made them as comfortable as they are beautiful, as simple as they are refined, as peaceful as they are powerful. And now he takes his aesthetics into the bathroom. Duranti has adopted all types of raw materials and productive technology, developed while concentrating his efforts on industrial design. The results of which are present in permanent collections of well-known museums throughout the world. His creations narrate imaginary stories and are full of irony which compete with everyday life. Although he has profound knowledge of productive work processes and the physical possibilities of raw materials, instead of technology he favours a narrative type of image. Giving each and every product a truly unique story.

take a bow

Among the world's most prominent — and talented — architects Milan born **Lorenzo Damiani** is best known for his striking designs which adhere to the theory that less is much more. He brings elegance to the products he touches. His understanding of smooth gently flowing lines and the effects they create with in the environment they are to be integrated has seen rise to numerous awards. Being able to maintain classic bathroom features while giving them a distinct styling twist, has progressed him through the every growing companies he now co-ordinates with.
